

A black and white photograph of several small seedlings growing in individual pots. The seedlings have small, rounded leaves and visible roots. The background is a blurred field of similar plants, creating a sense of a large-scale growing operation. A semi-transparent rectangular box is centered over the image, containing the word "GREENBOX" in a bold, sans-serif font.

GREENBOX

what?

Smart Indoor Organic
Garden that bridge the gap
between modern life and
nature

GREENBOX

what?

quality all year round

enjoy flavourful tastes and wonderful aromas

easy to use

just add pods and water, plug it in and enjoy the harvest. Greenbox does all the work for you!

happy environment

GREENBOX

what?

Food tastes
better when
you know
where it
comes from

the product

grow whatever
herbs, fruits,
vegetables and
flowers

GREENBOX future
technology
allows to
effortlessly
grow your own
organic crops
directly at home

GREENBOX

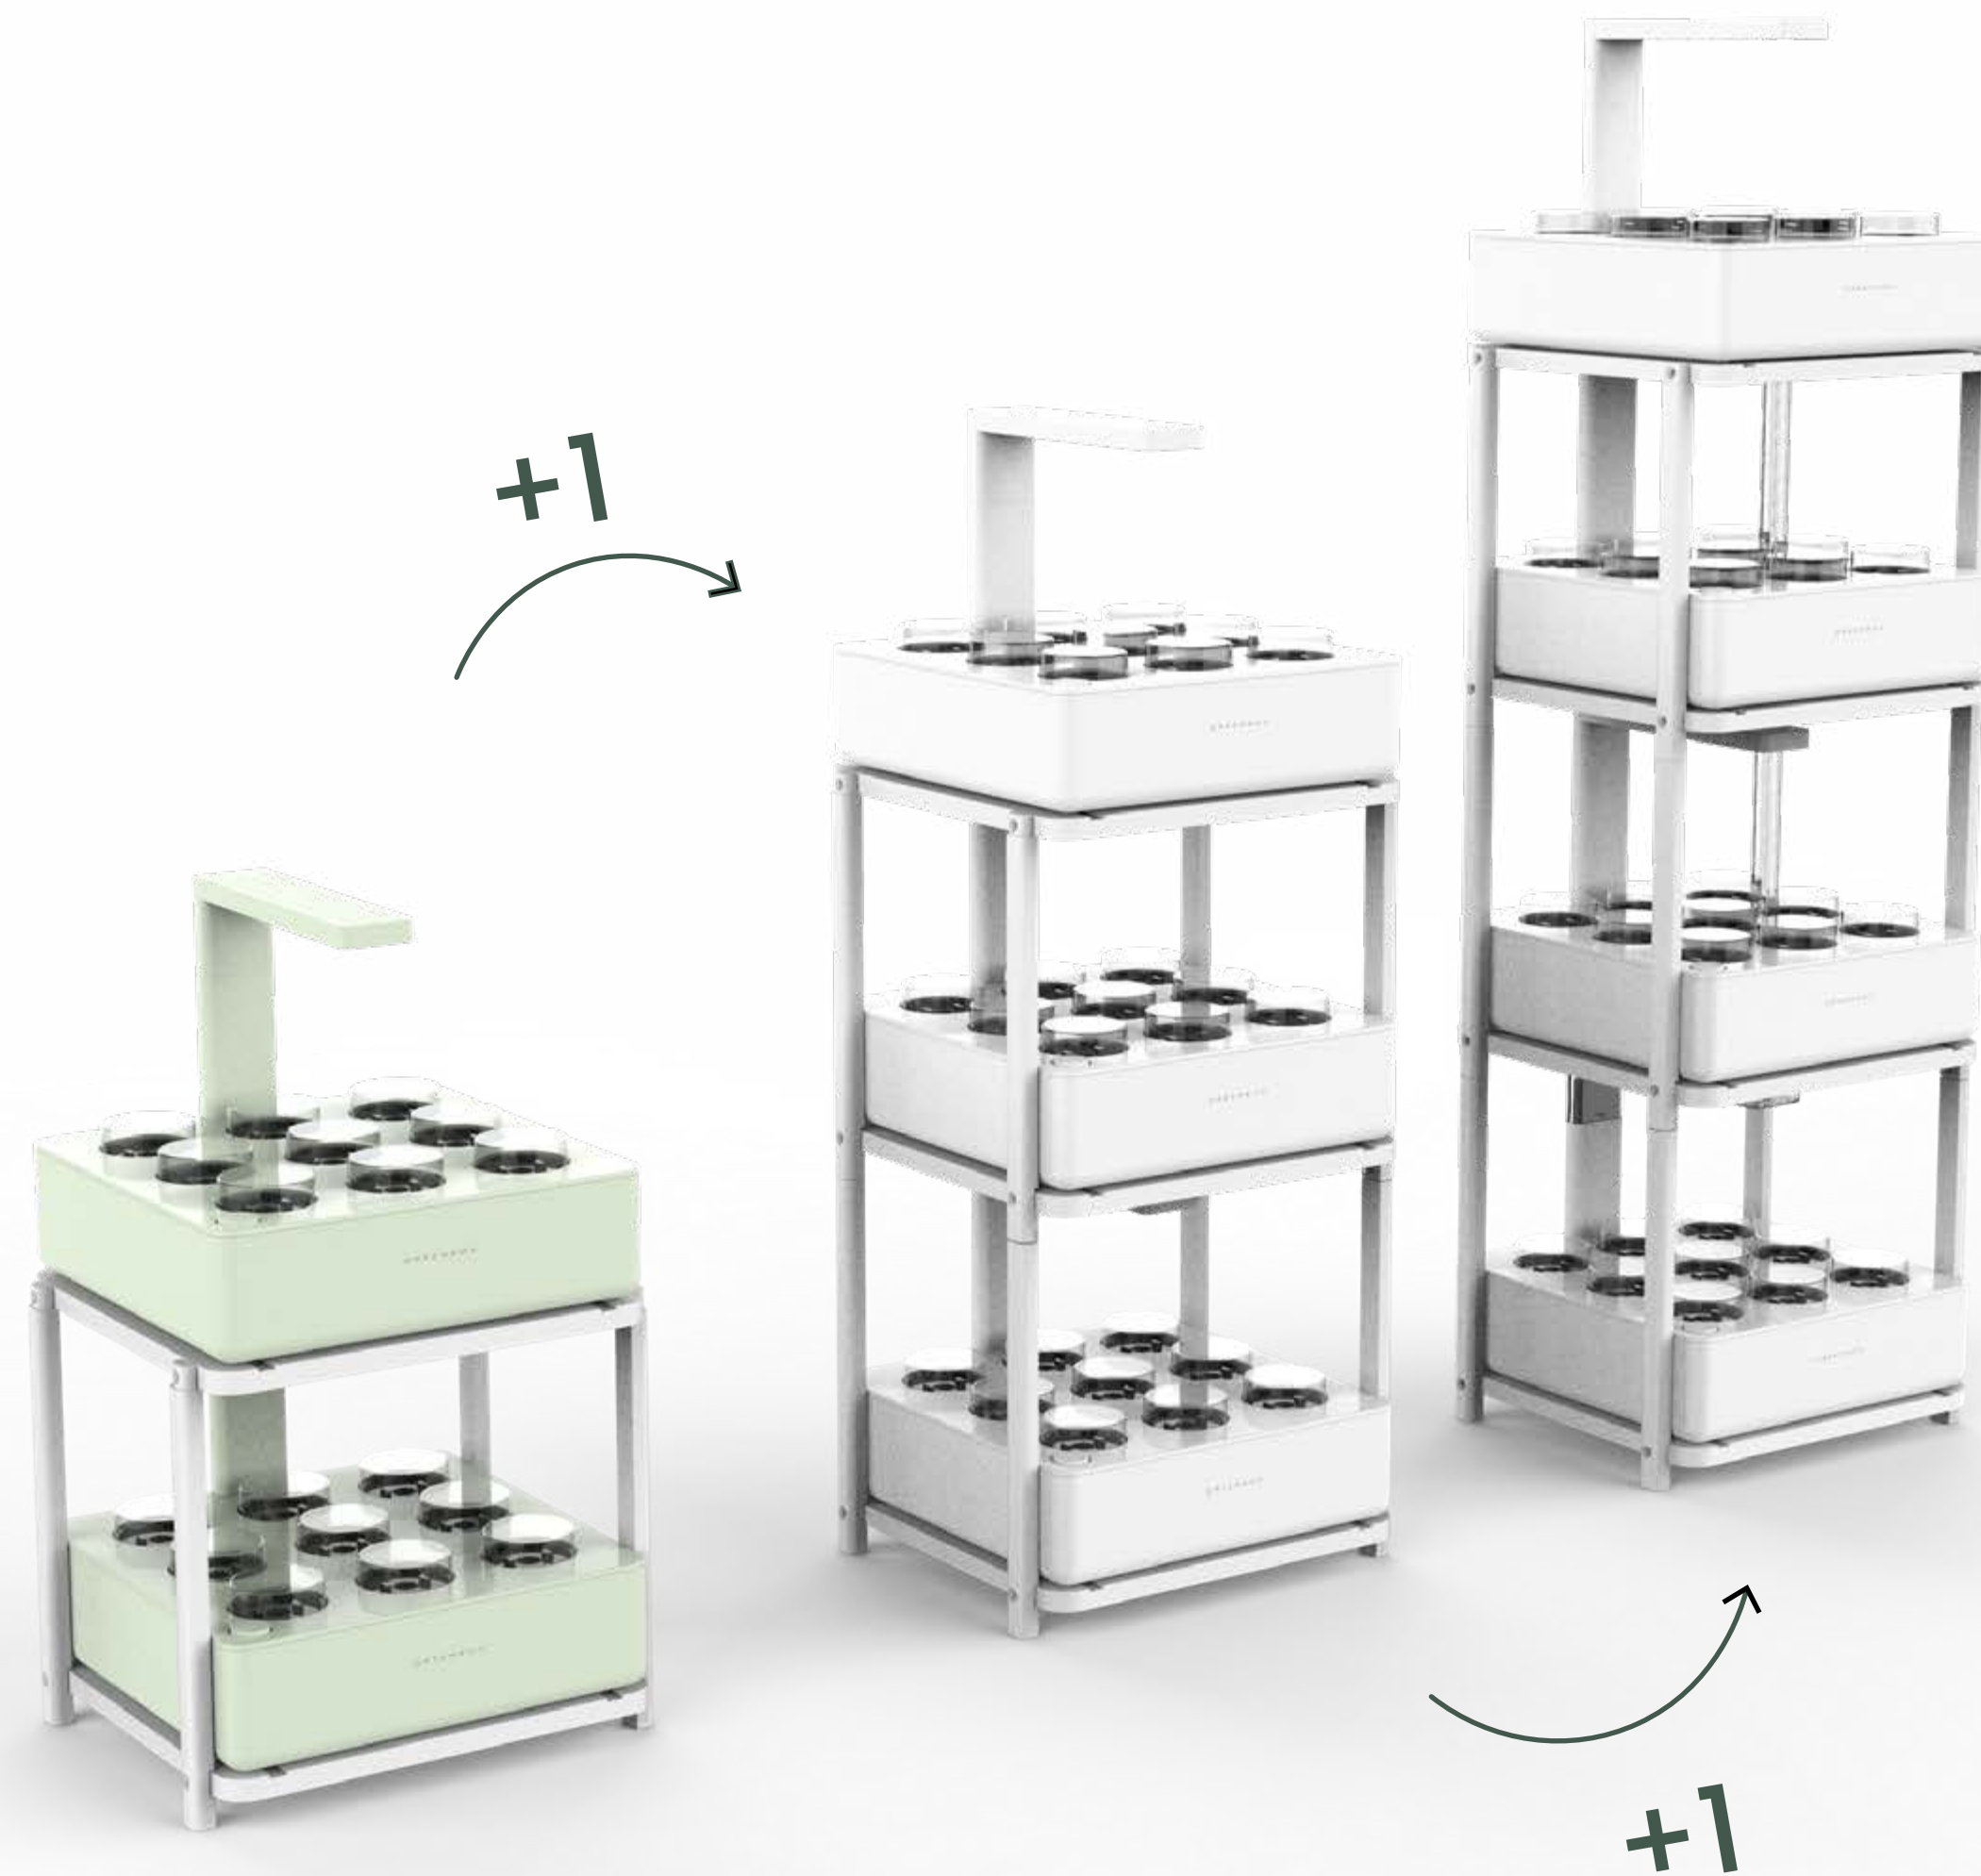

the product

choose and **enjoy** one of the **soft**
colours for your home

GREENBOX

the product

modularity

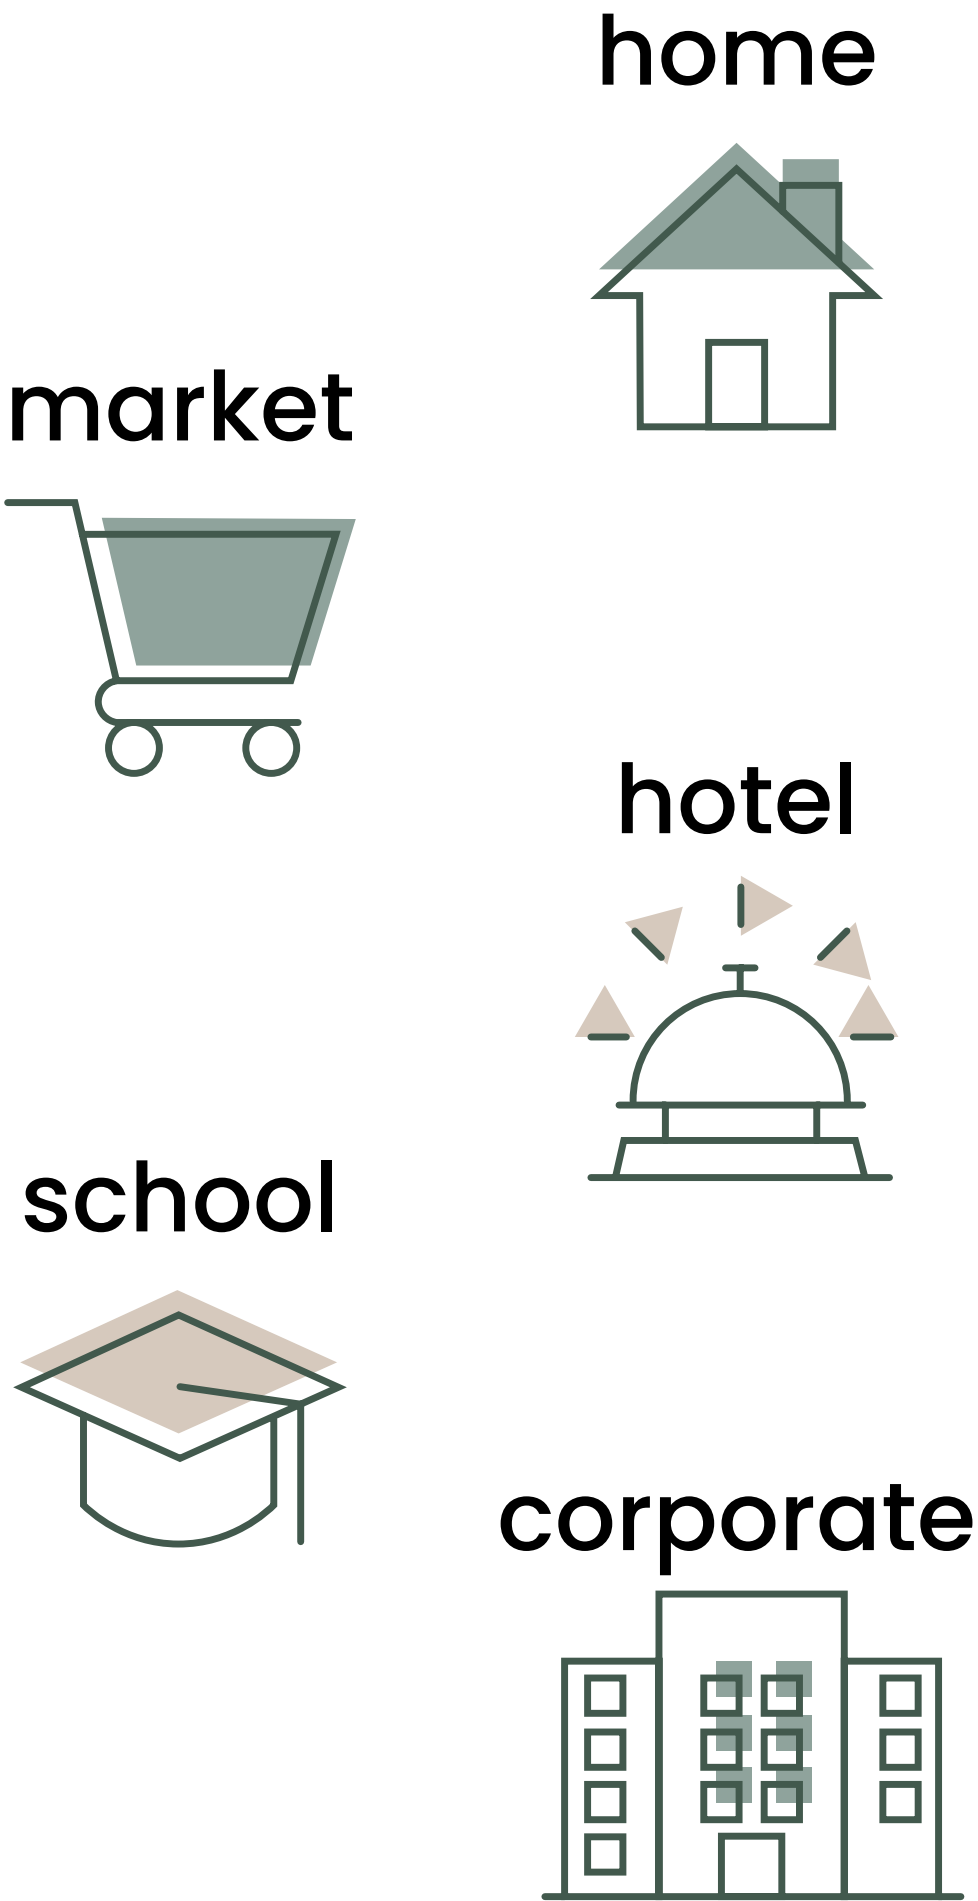

you can easily add
the single unit on
top of each other
as much as you
want and turn
your home into an
organic garden

GREENBOX

the product

example of Greenbox at home

flexibility

grow where you
live, work and eat

the product

adaptability

whether in the
desert or at the
pole, we enable
you to **grow**
healthy plants with
smart containers
independent
of the outdoor
environment and
the season

GREENBOX

how it works

1. add pods

the growth medium is made of **natural, organic degradable materials**, with **no pesticides, fungicides, harmful substances**

2. add water

Smart Soil creates the perfect environment for the plants to thrive

it ensures:
water well distributed
